

RISK ASSESSMENT: Ferny Crofts Site, General Use

Completed by: Ferny Crofts Operations Team

Date: January 2024

Review Date: January 2025

What is the Hazard?	Who may be harmed?	How might people be harmed?	Risk Rating			Control Measures in Place	Remaining Risk		
			Probability	Severity	Risk		Probability	Severity	Risk
Slips, trips and falls – General	Visitors Staff	Bruises and cuts, broken bones, sprains, other impact injuries.	3	3	9	<ul style="list-style-type: none"> • Pedestrianised areas and paths kept clear across the site. • Lighting provided in busy areas such as around accommodation buildings and toilet block. • Group leaders advised to brief young people to take care and not to run when moving around woodland areas. • All staff members are First Aid trained. • First Aid kits located within all of the buildings and instructed activity zones. • Group leaders required to carry their own First Aid kits. 	2	3	6
Use of the Car Park – Vehicles moving around site	Visitors Staff	Injuries caused by vehicle impact with pedestrians, such as cuts and bruises, fractures and sprains, head injuries.	2	4	8	<ul style="list-style-type: none"> • Site speed limit is 5mph • No unauthorised vehicles are allowed onto the camping areas. Only site vehicles or pre-arranged contractors (when accompanied by a member of staff) • Gates from car park are kept closed at all times, unless manned by a member of staff. • During times of high traffic volume, Ferny Crofts staff in high-vis jackets will be present to assist in directing traffic and pedestrians. 	1	4	4

RISK ASSESSMENT: Ferny Crofts Site, General Use

What is the Hazard?	Who may be harmed?	How might people be harmed?	Risk Rating			Control Measures in Place	Remaining Risk		
			Probability	Severity	Risk		Probability	Severity	Risk
Fire - Buildings	Visitors Staff	Injuries associated with large-scale fires, including burns, smoke inhalation, impact injuries from falling materials or explosion debris etc.	1	5	5	<ul style="list-style-type: none"> External Fire Risk Assessment carried out at least every 24 months, actions completed according to recommendations and monitored. All buildings fitted with fire alarm system which is tested on a weekly basis. All buildings fitted with fire extinguishers Fire escape routes kept clear and unlocked. Fire escape routes clearly marked. All visitors informed of fire safety and evacuation procedures in Welcome Pack. Ferny Crofts Staff trained in basic fire safety procedures. 	1	3	3
Fire - Campsite	Visitors Staff	Injuries associated with large-scale fires, including burns, smoke inhalation, impact injuries from falling materials or explosion debris etc.	2	5	10	<ul style="list-style-type: none"> External Fire Risk Assessment carried out at least every 24 months, actions completed according to recommendations and monitored. Campfires only permitted on concrete fire pits provided. Fire beaters and alarm bells provided across campsites Water fire extinguishers provided across campsites. All visitors informed of fire safety and evacuation procedures in Welcome Pack. 	1	3	3

RISK ASSESSMENT: Ferny Crofts Site, General Use

What is the Hazard?	Who may be harmed?	How might people be harmed?	Risk Rating			Control Measures in Place	Remaining Risk		
			Probability	Severity	Risk		Probability	Severity	Risk
Trees	Visitors Staff	Injuries or damage to property caused by falling trees or branches. Injuries including bruising and cuts, concussion, fractures, broken bones, other musculoskeletal injuries.	3	5	15	<ul style="list-style-type: none"> Tree management policy in place including regular tree survey by qualified arborist, to identify and remove dead, dying or dangerous trees. Regular site checks carried out by Tree Surgeon, including removal of dead wood from canopy. Site checks are carried out by the Maintenance Supervisor or Operations Manager after bad weather conditions. Any issues are reported to tree surgeon for further investigation and/or removal. 	1	5	5
Pond Area	Visitors Staff	Injuries associated with submersion in water, including drowning, hypothermia.	2	4	8	<ul style="list-style-type: none"> Clear signage displayed warning site users not to enter pond without a qualified instructor. Pond edges managed to ensure ease of escape in the case of accidental entry to the water. Site users advised to brief young people to stay away from the pond unless accompanied by a responsible adult. 	1	4	4
		Infection from water-borne diseases.	1	3	3	<ul style="list-style-type: none"> Regular external chemical testing of pond carried out to ensure safety of water. 	1	3	3

What is the Hazard?	Who may be harmed?	How might people be harmed?	Risk Rating			Control Measures in Place	Remaining Risk		
			Probability	Severity	Risk		Probability	Severity	Risk
LPG Gas Storage	Visitors Staff	Injuries caused by fire or explosion, due to combustion of gas.	2	5	10	<ul style="list-style-type: none"> LPG tanks located within secure fenced-off area to prevent unauthorised access. LPG Storage area kept clear of combustible materials to minimise danger of fire. Clear signage shown on fences to warn of flammable materials. Gas re-filled only by qualified external contractor (Calor). 	1	5	5
Water Systems – Legionnaires Disease	Visitors Staff	Illness caused by infection by Legionella bacteria, which may be present within water systems.	2	4	8	<ul style="list-style-type: none"> External third party risk assessment carried out every 24 months. Control measures put in place following recommendations made. (See full risk assessment for further information) Taps descaled on a monthly basis to reduce potential for growth of Legionella bacteria. All new water installations designed according to best practice for preventing growth of Legionella bacteria. 	1	4	4

RISK ASSESSMENT: Ferny Crofts Site, General Use

Level	Likelihood Factor	Severity Description
1	Very Unlikely	Insignificant – No injury or No First Aid required.
2	Unlikely	Minor – Minor injuries requiring first aid such as cuts, grazes, bruising.
3	Fairly Likely	Moderate – Injuries resulting in up to three days' absence from work.
4	Likely	Major – Injuries resulting in a week or more absence from work, for example broken bones, deep cut etc.
5	Very Likely	Catastrophic – Amputations or Death.
